

PROJECT ENGINEER

We are looking for a Project Engineer to strengthen our Marine Technology team. Join us on our mission to protect people, property and business continuity!

As a Project Engineer you will work with the HI-FOG® water mist fire protection systems in marine new building and upgrade projects.

The successful candidate enjoys teamwork, working closely together with the project management team. We expect from applicants a systematic, active and independent approach to work. You also need good communication skills, and readiness to work in an international business environment.

Your key responsibilities are:

- Sprinkler system layout design, pressure loss and material calculations
- Preparing of the project documentation / system user manuals
- Supporting of project managers in different project related tasks

To be successful in the role you:

- Formal qualification e.g. in mechanical / HVAC / shipbuilding engineering. Also suitable for a newly graduated / soon graduating person.
- Proficiency in MS Office tools and AutoCAD
- Ability to work in a team towards common goal
- Fluent English, both spoken and written
- Ability to work systematically with multiple tasks under tight schedules
- Enthusiastic attitude to utilize technology edge HI-FOG® products / systems

We also value:

- Experience about the marine technology / hydraulics.
- Understanding about the project business
- Other language skills

We offer you a dynamic and international work environment in a company with high technology products, a strong growth strategy and people who are passionate about fire safety. The position is located in our modern and functional office premises in Vantaa. At Marioff we value diversity in all its forms and we believe that it is our excellent, highly skilled people who make success, competitive excellence and innovation happen.
